WARRANTY**

Details on Page 5

Keep your valuables safe for generations to come

Some things in life you just can't control – fire, theft, and the spontaneous, unpredictable acts of children. That's why it's important to secure your valuables and guns in a safe place.

John Deere offers a complete line of high-quality, affordable safes that combine superior craftsmanship, certified fire protection, and U.L. Listed* security for ultimate protection of your valuables.

When it comes to securing your valuables and giving you peace of mind, there is nothing like a John Deere safe.

In the event of a fire or attempted break-in, your investments are protected:

- No cost for replacement safe
- No cost to transfer warranty
- No cost for delivery and installation
- Safe is guaranteed for life against fire and theft

John Deere Safes outlast the competition

MADE IN THE
USA

John Deere Safe

Competitor

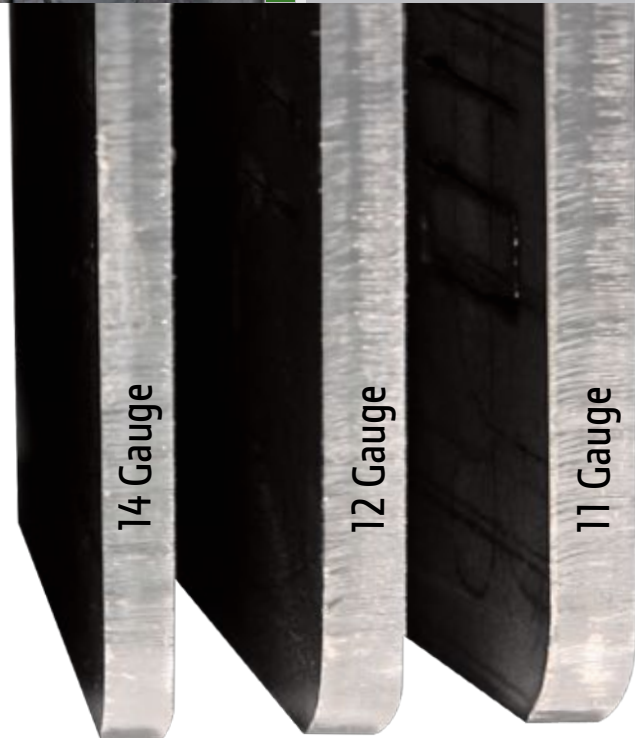

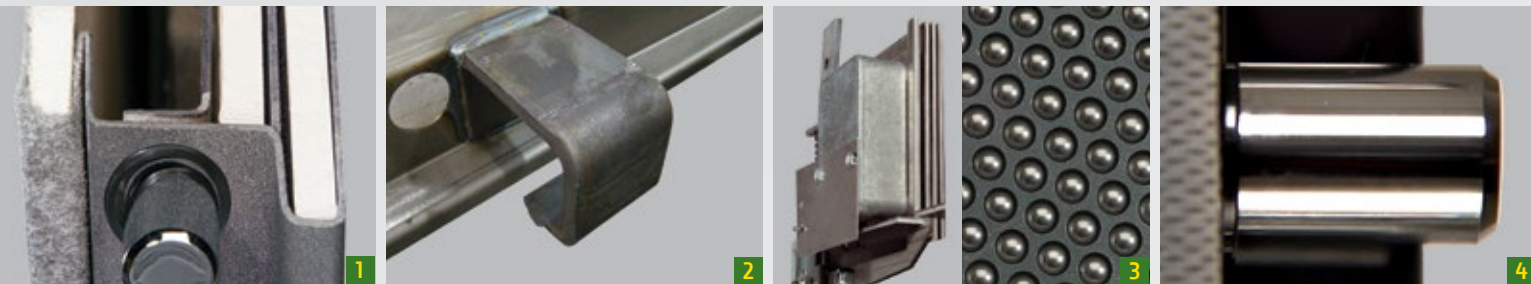

PHOTO: John Deere smashes the competition from 200 ft. fall!

Security Features

It's what inside that counts! According to Underwriter's Laboratory, the hardplate system installed in John Deere safes was one of the best they had ever seen. That is reassuring when protecting valuables from thieves. Look for the UL symbol of security on John Deere safes.

1. **Tough Doors™** – Thicker composite doors resist prying and increase fire protection
2. **Internal ball-bearing hinge** ensures a tighter secure lockup and smooth opening
3. **Triple-layered and ball-bearing hardplates** thwart even UL safe crackers
4. **More bolts** that are thicker, extend longer and increase prying resistance
5. **Thicker bodies** are robotically welded for tougher welds and stronger safes
6. **UL listed electronic and mechanical locks** trigger when drilled or torched
7. **Direct-drive mechanisms** protect against side bolt punching
8. **Spring loaded external relockers** lock-up the mechanism when punched or drilled
9. **Anti-pry tabs** increase pry resistance by 300%
10. **SureTight handle** ensures no thief can break the lock by torquing the handle

Special Security Feature: Every John Deere safe is pre-drilled for bolt-down security to prevent theft of the safe and discourage prying. (Anchoring kit sold separately)

5 The thicker the steel, the better the security and fire protection of a safe. Each John Deere safe is built with the finest steel to produce a beautiful finish while maintaining high security and protection. Quality pickled and oiled steel give our safes a clean, smooth finish and long-lasting durability. A unique roll-form process with robotic welding eliminates the top weld for greater strength and produces a uni-body design that is unequalled in the industry. See the results in our 200 ft. drop video at your local John Deere dealer.

John Deere safe survived longer than 60 minutes.

The competitor's failed in less than 23 minutes.

Fire Protection Features

In a head-to-head fire test, where both safes were tested for 60 minutes, our Premium Series safes proved to have 42% more fire protection than the competition's. Without the added protection from a John Deere safe, your valuables could go up in smoke.

Key reasons John Deere safes are the best in fire protection:

- **More 5/8" fireboard** interlocked in ceiling, walls, doorjamb and door
- **Thicker steel** in body and door slows down heat penetration
- **The most effective heat expanding door seal** to reduce smoke and heat

Add it all up and you'll see why our safes are the best fire-rated safes on the market today.

JOHN DEERE
Current Trademark (VJ24)

VJ24 with Dual-Flex interior holds up to 24 long guns*

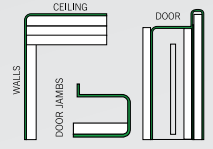

John Deere's Value Series is engineered to defend valuables better than other entry-level safes on the market. We put John Deere's Value safes to the test. In head to pry tests, the Value Series proved to be 6x stronger, showing once again Liberty's 4" locking bars and CNC 2 piece body is head and shoulders above the competition. Each safe is certified for 30 minutes of fire protection, including multiple layers of fire board. If you're on a budget, you just found the smart safe!

Security Features

1. 1" thick security and fire door
2. Extra hardplate for drill protection
3. UL listed electronic lock
4. Anti-punch external relocker
 - 2-piece CNC 14 gauge body (no welds on top sides!)
 - Direct drive mechanism with dual action stabilizer to keep bars engaged evenly
 - 10 four inch military style locking bars (6X stronger in pry tests)
 - Anti-Pry Z-Bar Design on 1" Composite Door
 - Single point slip clutch handle to resist torquing
 - Durable granite finish exterior

Premium Series

Our Premium Series safes exceed all expectations in storage capacity, security and fire protection.

75 Minutes @1200°
86,000 BTUs

MADE IN THE USA

Whether you're at home, out in the field, or away on vacation, John Deere Premium Series safes will exceed your expectations in style, function and protection of your valuables.

With 75 minutes of fire protection and John Deere's new Tough Door, you'll quickly see why smart thieves will walk away.

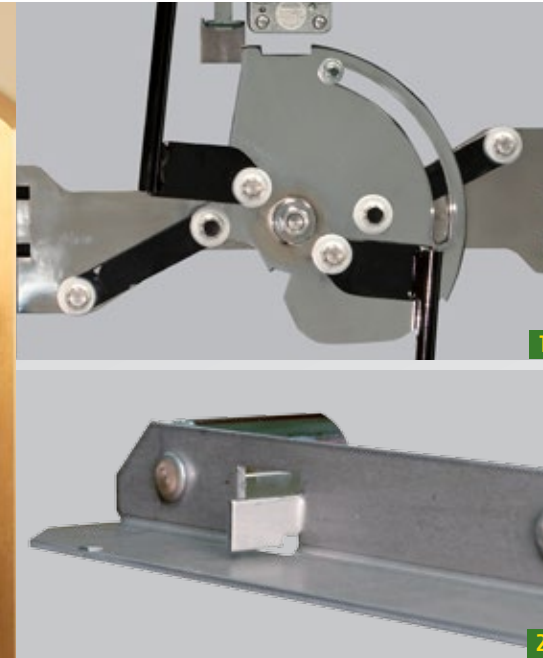

Upgraded security features in the Premium Series include a DX-90 over-center cam mechanism that helps prevent side bolt punching. It also has bigger and longer bolts with two anti-pry tabs to thwart prying.

John Deere's Premium PB25 Seeder Scene safe (below) includes a 75-minute fire rating and high security Tough Door. For even more gun capacity, look to the PM35 (room shot) or PF64 safe (not shown)- which holds up to 64 long guns!

Upgrades from Deluxe Series

- Added security features: Tough Door™, larger bolts, DX-90 Monster Mech
